

Varun Junnuthula

Software Engineer — Backend · Java · Spring Boot · AWS

Hyderabad, India | +91 96669 28966 | varunjunnuthula7@gmail.com | linkedin.com/in/varun-reddy-junnuthula | github.com/VarunReddyJunnuthula

SUMMARY

Backend-focused Software Engineer with 2.5+ years building secure, scalable services in Java and Spring Boot on AWS. Strong in REST APIs, microservices, OAuth 2.0/OIDC security, CI/CD, and observability, with growing hands-on work in AI-powered automation (Claude API, MCP, RAG). Focused on clean architecture, reliability, and production-ready delivery.

TECHNICAL SKILLS

Languages	Java 17, Python 3, JavaScript / TypeScript, SQL, Bash
Frameworks	Spring Boot 3, Spring Security (OAuth2 / OIDC), Spring Data JPA, React 18, FastAPI
Cloud & DevOps	AWS (EC2, S3, RDS, Secrets Manager, CloudWatch), Docker, Kubernetes, GitHub Actions CI/CD
Databases	PostgreSQL, MySQL / MariaDB, Redis, Hibernate / JPA, Flyway
Security	OAuth 2.0 / OIDC, JWT, JWKS, mTLS, OWASP Top 10
AI & Automation	Claude API, MCP tool orchestration, RAG pipelines, pgvector, LangChain
Observability	CloudWatch, New Relic APM, Micrometer, Grafana, Splunk, structured JSON logging

PROFESSIONAL EXPERIENCE

Zensar Technologies

Jun 2025 – Present

Software Engineer — Backend

- Design and build secure, scalable REST APIs and microservices using Java 17 and Spring Boot 3.
- Implement authentication and authorization with Spring Security, OAuth 2.0 / OIDC, and JWT / JWKS.
- Deploy and operate services on AWS (EC2, S3, RDS, Secrets Manager) with Docker and GitHub Actions CI/CD.
- Instrument services with CloudWatch, Micrometer, and structured JSON logging to improve reliability and diagnostics.

Qualinsys Technologies

Nov 2024 – May 2025

Software Engineer

- Developed microservices and database-backed APIs with Spring Boot, Spring Data JPA, and Flyway migrations.
- Modeled and tuned relational schemas across PostgreSQL and MySQL / MariaDB; added Redis caching for hot paths.
- Containerized services with Docker and automated build, test, and deploy pipelines using GitHub Actions.

Chaitra Tech

Jan 2024 – Oct 2024

Junior Software Engineer

- Built features across the stack with Java, Spring Boot, and React 18, contributing to production releases.
- Wrote unit and integration tests, resolved defects, and supported deployments under senior mentorship.
- Collaborated in Agile workflows using JIRA and Git-based code review.
